We take pleasure in submitting this list of Bulbs, Seeds and Plants for your consideration. We have not tried to list every variety known in their respective classes, but have limited our selection to what we consider the very best; varieties that have proven by test to be everything that they are recommended to be.

It is our endeavor to supply only goods of the very highest quality, and our constantly increasing patronage is sufficient assurance that our efforts in this regard are being appreciated. We feel sure a trial order will convince any new customer of the excellence of our stock.

You may order from us with the assurance that your requirements will be handled by practical seedsmen or plantsmen; men who have spent a lifetime in horticulture and whose first interest is and always will be to take care of their patrons in a manner that is thoroughly satisfactory.

Correspondence on horticultural subjects is invited, and your patronage is respectfully solicited.

FLOWERING PLANTS

For Winter Forcing

DELIVERY: OCTOBER-NOVEMBER

AZALEA INDICA

These highly decorative plants are now successfully raised in this country. They have a wide range of color and the flowers will keep from four to six weeks after being forced, provided they are not kept where the heat is too excessive. If on arrival the roots appear dry, soak them well in a pail of water. After being potted, place them in cool greenhouse. As the desired time for forcing is at hand, they should be transferred to a warmer house and in the process of forcing, the temperature should be increased to from 60-70 deg. until the flowers appear. As flowers develop, temperature should be reduced to give them more substance. Plants that are to flower in early Spring do not require this intense treatment. As some varieties are better adapted for early forcing, we are listing them in the order of flowering.
